AFI SIGNAGE

Client Onboarding Pack

Everything for install day, from the first site check to the first content update. Your display runs on your own edge device, on your own screen, in your own window.

01 LOCAL-FIRST
Runs on your device, keeps running offline.

02 MANAGED
Content, warranty and support included.

03 INSTALLED
Ninety minutes on site, live before we leave.

CLIENT	PACKAGE	GO-LIVE DATE	PREPARED BY
			AFI Signage

WELCOME

Your window is about to get a lot more interesting.

Thank you for choosing **AFI Signage**. What you are getting is not a subscription to something that lives on someone else's server. It is a **small computer** that sits behind your window, runs your display **locally**, and keeps working even if the **internet does not**.

This pack covers the practical side: what we need from you **before install day**, what happens **on the day**, how **content changes** work afterwards, and **exactly how to reach us**. Read it once, then keep it somewhere you can find it.

YOUR PACKAGE AT A GLANCE

ITEM	INCLUDED	SERIAL / ASSET ID
Package tier		
Display		
Edge computer		
Application level		
Inputs		
Serial outputs		
Audio		
Frame / cabinet		
Term and billing		

Completed with your installer at handover, and confirmed by signature on the final page.

1 Local

Runs on hardware you can see. No cloud outage takes your sign down.

2 Managed

Content changes, monitoring and warranty are all included in your rental.

3 Yours to use

Your branding, your hours, your offers. We handle the machinery.

> **One promise up front:** nothing is metered. No **data caps**, no **per-view charges**, no **surprise invoices**. One flat rate, agreed in writing.

WHAT HAPPENS NEXT

1 This week

We confirm your **install window** and resend the page 3 checklist.

2 Before we arrive

You send **logo, hours and offers**. We build the first loop and preview it.

3 Install day

Ninety minutes on site. Your window is live before we leave.

STEP ONE

Before install day

Most installs that go badly go badly because of something on this page. **Ten minutes now** saves a **return visit** later.

SITE REQUIREMENTS

	ITEM	WHAT WE NEED
☐	**Power outlet**	One grounded outlet within **6 ft** of the display, not switched by a light switch.
☐	**Wall or mount surface**	**Solid wall, glass or VESA**. Brick, plaster and storefront glass all need different hardware.
☐	**Network**	Wi-Fi name and password, or a free **Ethernet port**. Guest networks that require a browser login will not work.
☐	**Mounting height**	Centre of screen **5 to 6 ft** from the floor, or at your existing signage height.
☐	**Viewing distance**	The furthest point a customer will read it from. This sets the **text size** we design to.
☐	**Sunlight**	Is the window in direct sun for part of the day? We adjust **brightness** and matte finish accordingly.
☐	**Access**	Someone on site **with keys** during the install window, plus parking or loading access.

CONTENT ASSETS TO SEND US

	ASSET	NOTES
☐	**Logo**	**Vector** (SVG, AI, EPS) is ideal. High-resolution PNG is workable. A photo of a sign is not.
☐	**Brand colours**	**Hex codes**, or tell us to sample them from the logo.
☐	**Hours**	Including **seasonal** or holiday exceptions.
☐	**Current offers**	Up to **five** to start. We will design the rotation.
☐	**Recurring events**	Trivia night, live music, sale days, anything on a **schedule**.
☐	**Live data**	Weather, sports, queue numbers, **custom feeds**. Tell us what should be live rather than typed.

> **Send it all to one address, once.** A shared folder link beats twelve text messages. If you do not have the logo in vector, say so early and we will **redraw it**.

STEP TWO

Install day

Ninety minutes on site, then a week of settling in. Here is the schedule from **one week out** to **one week after**.

7 DAYS OUT	**Confirmation.** We lock the install window, confirm the network details, and agree who will be on site. If anything on the checklist is missing, we flag it now, not on the day.
1 DAY OUT	**Content draft.** You receive a preview of the first sign loop — your logo, hours and offers, already animated. Reply with any changes today so day one looks right.
INSTALL DAY	**90 minutes.** Mount, power, network, alignment, brightness calibration, first content loaded, then a short walkthrough. You will see the sign running before we leave.
15 MIN	**Handover.** How to request changes, who to call, what normal looks like. One page, no jargon, kept behind the counter.
24 HOURS	**Remote health check.** We confirm the device is online, the schedule fired, and the display came back after its first overnight. You get a short confirmation.
7 DAYS	**First review call.** Fifteen minutes. We look at what is working, adjust wording or timing, and set your update rhythm.

WHAT TO HAVE READY ON THE DAY

Practical

Keys, ladder access, **Wi-Fi password**, and a clear path to the install point. Cash drawer and staff areas not required.

Decisions

The one or two people who can **approve wording**. Changes made on the day are free; changes made after are scheduled.

Timing

Before opening is easiest. If that is impossible, we install during trading hours and work around customers.

Expectation

The first loop is a **starting point**, not a final design. Week one is for tuning brightness, speed and wording.

> **If something is not right, tell us that week.** Brightness, scroll speed and text size are all adjustable remotely, usually the same day. Waiting a month makes a small tweak into a project.

WHAT WE BRING TO SITE

Display and mount hardware · **pre-configured edge computer** · power and signal cabling · network adapter if needed · calibration tools · **one spare device**

You do not need to move furniture, clear the window, or prepare anything technical. A **clear path** to the install point and a **Wi-Fi password** is the whole job.

STEP THREE

Content, scheduling and live data

You do not need to learn software. You tell us what should be on the screen, and when. There are **three ways** content changes.

METHOD	HOW IT WORKS	TURNAROUND
Request	Text or email the change. We edit, preview, and push it to your device.	**Next business day** Same day for urgent
Scheduled	Rules you set once: happy hour from 4 to 7, lunch menu until 3, closed on Mondays.	**Live immediately**
Live feed	**Weather, scores, queue numbers** or your own data, rendered in the sign style.	**Updates continuously**

HOW A DAY MIGHT LOOK

7am — opening
Hours, weather, and the day's first offer. Brightness at daylight level.

12pm — lunch
Menu focus and a short promo. Faster scroll, larger type for passers-by.

4pm — happy hour
Scheduled takeover, warmer colours, higher contrast against evening light.

After close
Dimmed, quiet loop, or off. Your choice, set once and forgotten.

WHAT IS INCLUDED EACH MONTH

ITEM	INCLUDED
Content updates	Per your package — from **1 to 8** per month
Live data feeds	Per your package — weather, sports, custom JSON
Seasonal refresh	Holiday and seasonal themes applied at **no extra cost**
Broken content fix	**Same day**, always, regardless of allowance
Hardware fault	Swap under warranty, **spares carried locally**

> **The only rule:** if the screen is showing something wrong, it is an **emergency**, not an allowance question. Call. We fix it first and sort the paperwork after.

STEP FOUR

Support, billing and sign-off

SUPPORT

Hours	Mon–Sat, **8am–8pm**
Urgent	Phone or SMS, **7 days**
Standard	Email, **next business day**
First response	**Per your package SLA**
Remote first	Most issues fixed without a visit
On-site	Included where your tier states

BILLING

Cycle	Monthly in advance
Method	Card or ACH on file
Annual prepay	**10% discount**
Deposit	One month, refundable
Late fee	**5% after 10 days**
Increases	**Fixed for the full term**

TERMS IN PLAIN LANGUAGE

- **The hardware stays ours.** You rent the system; we maintain, repair and replace it for the term.
- **You keep the content.** Logos, offers and images remain your property, and we export them to you on request.
- **Your data stays local.** Camera and sensor processing happens on the device. Nothing is recorded or uploaded.
- **Relocation is included once** per term. Additional moves are quoted at the time.
- **Early termination** is the remaining balance less 40%, payable in full. It is there to protect a three-year asset, not to trap anyone.
- **End of term** you may renew at 60% of your rate, upgrade, buy the hardware at 10% of its cost, or return it.

> **We never disable a working sign over a billing dispute.** Service is paused only after written notice, and equipment is collected in person.

ACCEPTANCE

By signing below, both parties confirm the package details above, the support terms, and the billing terms are correct and accepted.
